

My website will act as a portfolio of my artistic works. It will have my 2d art (digital and traditional art) and my 3d art (sculpture and mixed media) as the child pages. The home page will have an about the artist section and links to the other pages. I will also have links to my social media pages. On each of the child pages, there will be a gallery of my work with the title and medium used under each image. The child pages will also have a brief explanation of my process or purpose.

About me: I grew up in Laguna Beach, California, a town well known for it's artistic community. I had access to a large collection of classes and inspiration. I use any medium I can get my hands on and can get my ideas across. I create with the intention of having fun and ending with a piece I can be proud of. My preferred medium is acrylic paint but the canvas can range from a typical canvas to shoes and sculpture. I have begun to work digitally in an attempt to learn a new medium and create different types of art. From fun visual pieces to posters, I have a wide variety of work.

3d works: Three dimensional art began as a guilty pleasure and evolved to become my espired career. I started by painting on various surfaces, such as shoes, graduation caps, and various random projects that never truly came to fruition. From there I learned about the basics of sculpture and the use of different medium. From representational art to abstract, I have truly fallen in love with creating three dimensional art.

2d works: Starting at a very young age, I was exposed to 2 dimensional art and the process of making a cohesive piece. As I grew up, I began to explore diferent mediums and found inspiration in the world around me. I have always wanted to be an artist in some capacity and I think my art shows my passion to fulfill my childhood dreams.
